

At Dezos we deal with the protection of property. We have made it our mission to create transparency and organization in the relationship between things, people and the law in order to reduce property and fraud offences.

TOKEN ECONOMICS

TOKEN DISTRIBUTION

50% of the tokens are provided for token sales and distributed to the community.

16% of the tokens will provided to the founders & team with a vesting schedule between 3 (founders) and 1 year (team) with a 6 month cliff.

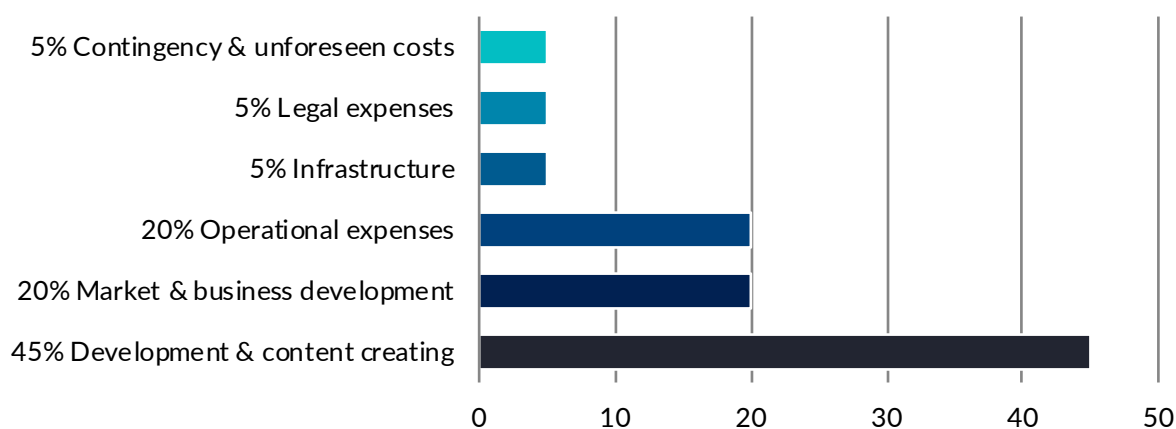

15% of the tokens will be retained as a reserve and used for further project development.

10% of the tokens will provided to partners and community groups. This enables the implementation of the DEZOS Ecosystem and Protocols in the business processes and leads to growth.

7% of the tokens will used for marketing, bounty and airdrop programs. This serves the best possible distribution of the DOS tokens.

2% of the tokens will provided to our valuable advisors with a vesting schedule of 1 year.

PLANED USE OF PROCEEDS

45% of the funds will be used for the development of the DEZOS protocol and applications. In particular, the desktop application and search engine. In addition, the mobile applications for iOS and Android devices. Developing and providing interfaces to customers and partners (e.g. retail, e-commerce, auction platforms, lost & found, law enforcement authorities, insurance agencies and more).

20% of the funds will be used for marketing campaigns to promote the DEZOS applications and lead it to a mass adoption.

20% of the funds will be used to open up new markets and for worldwide expansion. We begin with the gradual expansion. This can be either regional or product related.

5% of the funds will be used for office space, furniture, IT infrastructure, customer care, human resources and consumables.

5% of the funds will be used for legal. This includes contracting, registrations, trademark and patent protection as well as legal advice.

5% of the funds will be used for unforeseen costs.

DOS TOKEN ECONOMY

UTILITY USE

In order to become a verified User on the DEZOS Ecosystem, such as for item transactions and item conditions changes, the corresponding number of DOS-TOKENS must be added to the DEZOS Ecosystem. Without this, no service in the DEZOS platform can be used.

PROFIT SHARING

Subject to final decision and provided a profit has been made, the board of DEZOS may allocate a certain amount out of such profits for distribution to token holders (profit share). A payment proportionate to the token holdings is sent out to each token holder. With a smart contract we evaluate the current holdings and distribute the profits to the token holders even if we switch from ethereum to another network.

FOUNDER & TEAM VESTING

Vesting ensures long-term alignment of interests and is standard for any serious project. All founders will have a 3 year vesting schedule with a 6 month cliff. This means one-sixth of the tokens will be matured every 6 months.

All team members will have a 1 year vesting schedule with a 6 month cliff. This means the half of the tokens will be matured after 6 months.

SECURITY

Partnerships with respected companies and projects such as [ICOnator.io](https://icinator.io) and [Papers.ch](https://papers.ch) will ensure the security of the token smart contract, sale and funds.

LOGISTICS

Instructions for participation and Ethereum & Bitcoin contribution addresses will only be communicated on the DOS token sale dashboard.

NOTE:

Citizens or residents of the **US, Iran, North Korea**, and **Singapore** will be unable to participate in the DOS token sale.
